ABOUT

In less than a decade IT sector has revolutionised each realm of our life. Unarguably it has changed the concept and direction of business world across the globe.

We are proud and over the moon to share that among the myriad of IT companies Webcom Systems is the foremost authority to bring this change in our region. Since our inception in year 1998 , Webcom is scaling new heights with its international standard services and sincere efforts. Our innovative, customised and holistic IT solutions and services give synergy to any business in achieving goals. To deliver value to our customers our team of IT experts conducts thorough research to cater customised IT solutions like web development, web designing, web promotions, networking solutions, e-commerce development, animation, SEO, SEM, consultancy, out sourcing, project management, maintenance, support and many more . We always take long term, low cost disciplined approach which delivers value throughout the cycle. Such progressive thinking of our global R&D and technical networks enables us every time to deliver leading solutions.

Let us now talk something about our presence across the globe. As a top IT solution provider, we are making rapid strides in many countries from America, Asia, Europe and Middle East. Not directly, but yes with our partners we are making our presence felt even in most remote and untouched markets. We are not at all doubtful to announce that with our growing turnkey solutions we are growing swiftly.

Coming to our expert team, we are small and focused team of more than 100 experts who always foster innovation and learning culture. We have pooled industries best well qualified software engineers at our excellence centre in Chandigarh, India. From here our team constantly work with empirical approach to deliver path breaking IT business solutions. Thinking of professional and time saving end-to-end IT solutions and nothing else is the motto of our team's work culture. Last but not least, 24X7 working hand-in-hands with all our clients and partners is the highlight of our team's work culture.

As a synonymous of IT Solution Company, we always work hard for your money. Find exceptional IT solutions to prop up your business by joining the bandwagon of successful companies. Make up your lost ground! To know more about our IT services kindly contact our experts.

Core Values

By efficiently managing complete IT infrastructure with low cost solutions, our purpose and aim is to enable companies to focus on their core business only. We are proud of having a prime motto of altruism. Our core values to achieve this target are:

1. Believe in delivering quality only
2. Commitment to innovation and excellence
3. Positive team spirit
4. Passionate and determined
5. Work with reliability, loyalty, honesty
6. Optimistic and efficient
7. Work with sustainable eco-friendly ways
8. Commitment of doing good for society

Mission Statement

As a synonym of a complete I.T solution provider company we are eyeing to combine reliability, marketing strategies, quality products and best customer service with competitive prices to deliver enduring customized solutions to all our esteem customers. With our short term actions and long term market focused approach we are constantly producing top results thereby nurturing value for our clients. Unlocking the true potential of our clients to enable their business to excel swiftly is our sole mission. We are striving to become one stop shop destination for IT solutions and consultancy.

Vision Statement

Webcom Systems is working earnestly with grit to become a globally respected foremost authority as IT solution provider enterprise . We believe in constant simple user friendly innovations that support business houses to realize their true potential. We also believe in making our company a great enviable learning platform for all our employees in order to nurture loyal partners and clients . In short, practically to become most admired IT company for its people, partnerships and performance. We well understand our responsibility as a global citizen and hence constantly believe to focus on sustainable measures to make our planet green. We believe in reducing our carbon footprint as much as possible .

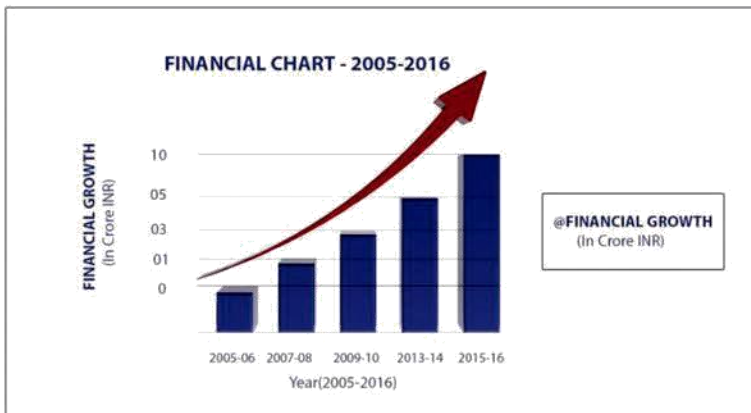

Financial Strategy

"Firm financial strategy is one of our company's building blocks"

Corporate financial strategy carries its own importance for an organization. But without a well defined usage and knowledge about financial strategy, even a big corporate house fails to make the desired impact. It is pertinent to mention here that inappropriate usage of finances mars the prospects of market growth. Therefore, in order to rise above rival companies and reach higher echelons it is necessary to keep the fire burning with sustainable flow of finances.

Taking all this into account, financial planners of Webcom System have adopted a firm and sustainable model of financial strategy. For this sustainable model, our top financial advisors formulated a precise investment strategy for the company based on the business objectives, resources and future plans. Excellence of our detailed financial strategy is that it addresses all significant aspects related to finances like operations expenditure, investments, cash flow, productivity, product / technology development cost, accounts payable and accounts receivables. Big picture here is that while conceptualizing this asset management strategy we casted thorough spot light on our short term as well as on long term plans.

Financial Strategy

Let's have a brief look at our monetary history. Nearly two decades back in year 1998 , we commenced our business with support of loans from local banks. Gradually, we marched ahead on our financial roadmap by upholding the delicate balance between company's assets and liabilities. Our strategic thinkers intelligently raised appropriate amount of capital before going to the next stepping stone. In the same time period, long term contracts with some of the reputed corporate houses generated substantial amount of profits for us. We further wisely invested big share of our profits for company's establishment and development. This obviously created more and better business opportunities thereby further strengthening the inflow of revenues. Bottom line of our financial growth is that since our inception we are constantly on the rise. Firmly standing on this solid platform of previous year's success, we have touched the figure of 100 million INR in the year 2015 .

Further, future looks promising as we have undertaken new big government projects. With new big projects in our bag the financial revenue generation figure for the current year is expected to double itself. In addition, we are sure to generate more revenues in future pertaining to our big off shore expansion plans. All in all, with sound financial strategy we are now war ready to tackle burgeoning revenues from our successful business .

Infrastructure

Although we have the best infrastructure in our league, yet we believe there is always scope of improvement. Moreover, every year new clients are associating with us and hence our profitability and cash flow are also touching new heights. Considering all these advancements Mr. R.K Vatts, CFO and Infrastructure Manager of Webcom Systems is earnestly working further to improve business infrastructure to deliver value to our esteem customers .

Brief detail of our business infrastructure is given below for your ready reference.

1. Facility Infrastructure

- 2 floors with 3000 sq ft development and operations centre

Don't lag behind just contact our experts to ensure success of your e comm business.

Graphic and Multimedia Solutions

"A good website without appealing graphics and multimedia features is like a hook without bait. Just go for graphics and multimedia solutions to boost your websites prospects"

To kick start any website in an appealing manner definitely a company adds graphics, videos, images and many more such visually attracting features. Apart from making a website more engaging these features helps to cast spotlight on the company's work culture, vision, mission, values and objectives. Website is actually the face of the organization and hence it regularly requires revamping services to keep visitors engaged as well as well informed. As per an old saying "Beauty is whatever that gives joy" (Edina St. Vincent Milley). Hence, don't even think twice to augment the beauty of business website with impressive features after all it's a matter of company's identity. Moreover, multimedia solutions are the most effective means to convey ideas.

With Webcom System's graphic and multimedia solutions you can substantially grab the attention of online visitors. Our team of multimedia designers works diligently to create original and innovative web graphic design to generate more views as well as to add market value. To bring a website on the forefront we have recruited the most efficient creative team that strictly works within the budget and timelines given by the clients. In addition, with our on site and off site multimedia and graphics services we are positioned firmly to help our clients to be more competitive.

Our multimedia services are powered with following features:

- Logo / Banner designs
- Brochures / E-Brochures
- Flipbook designs
- Intro presentation
- Advertisements
- Corporate profile presentation
- Product catalogue / E-Catalogues / Flash Catalogues
- Training/Tutorial presentations
- 2D-3D Animation
- Walkthrough
- PDF Catalogue

Quality Assurance & Testing

All the software solutions developed undergo following cycle of testing:

Requirements Analysis:

Testing begins in the requirements phase of the software development life cycle.

Design Analysis:

During the design phase, testers work with developers in determining what aspects of a design are testable and under what parameter those tests work.

Test Planning:

Test Strategy, Test Plan(s), and Test Bed creation.

Test Development:

Test Procedures, Test Scenarios, and Test Cases & Test Scripts to use in testing software.

Test Execution:

Testers execute the software based on the plans and tests and report any errors found to the development team.

Test Reporting:

Once testing is completed, testers generate metrics and make final reports on their test effort and whether or not the software tested is ready for release.

Retesting the Defects

In this cycle applications are passed through following levels of testing:

- Component testing tests the minimal software item that can be tested.
- Component integration testing exposes defects in the interfaces and interaction between integrated components.
- System testing tests an integrated system to verify that it meets its requirements.
- Acceptance testing allows the end-user or customer to decide whether or not to accept the product.
- After modifying software, either for a change in functionality or to fix defects, a regression test re-runs previously passed tests on the modified software to ensure that the modifications haven't unintentionally caused a regression of previous functionality.

Application Maintenance and Support

It has been observed that many good companies find it hard to run even their most coveted high revenue generating projects. The reason is they have never done the maintenance work for their project. Moreover, to have edge over the rivals companies have to quickly adapt themselves as per the ever altering dynamics. App maintenance gives an opportunity to quickly adapt as per prevailing market dynamics.

We are proud to announce that we have years of experience of this arena. With our excellent application support and maintenance services domain knowledge we give additional value to a company. Our application support maintenance works on the fundamental principle of adapting, correcting, perfecting and preventing. Best part is that in case of any urgent situation our executives provide exclusive on time services at client's site to meet business objectives.

We are extending the investment value of not only the local clients but also delivering the value to our off shore clients. We offer annual maintenance plans which are tailor made as per the client's requirement. Round the clock assistance facility for our customers is another feather in our application maintenance services. To get more insights about our services give us a call.

Off Shore Development

"Turn the tables with our proven off shore development services"

Webcom System has always worked with a farsighted developmental vision to bring the paradigm shift in the market. Pertaining to this approach in no time we have established our IT solutions and services as best in the business. Not only confining to local limits, as top Offshore Development Company we have surpassed the boundaries and have incisively penetrated the off shore global markets. We are swollen with pride to declare that with our 'up to the mark' international standard services we have outshined even the local players of foreign lands.

Precision and clarity are the two hallmarks of our offshore programming. Our professional off-shore developers team work with utter discipline to deliver custom software development that too strictly within set framework, budget and time lines specified by client. As a virtual office for client, we assist throughout the life cycle of project i.e. during concept development, establishment of set up, operations, resource management, maintenance and training. In one line, we have proven track record of offering A to Z IT solutions. Not finished yet! Going a step further then our rivals we have established a separate 'Offshore Development Center' (ODC) to exclusively take care of our off shore clients.

Few highlights of going with offshore application development services are given below:

1. Cost effective
2. Specialized services
3. Gives access to large pool of experts
4. Offers quality
5. Delivers complete services
6. Provides improved flexibility
7. Round the clock ease of use and availability
8. Reduces liability
9. Trim down risks
10. Helps client to focus on their prime business

Project Management

"Specialized in effective project management we transform concepts into reality"

No corporate becomes successful just by putting ideas on the paper. Important and big thing is that how precisely and timely a corporate implements its ideas on the ground. Harsh reality is that path from idea to reality is uneven and tough. Therefore, even well established players of the market need a reliable partner for assistance at each stage.

Here the role of Webcom System becomes significant. We assist corporate houses in giving shape to their dreams by transforming concepts into realities. We are proud and over the moon to share that we have successfully undertaken project management tasks for some of the markets large and mid profile corporate houses. We believe in offering pro active solutions to meet cost, time lines and targets of a project. Great thing about us is that from supervision, inspection, training to commissioning, we meticulously take care of each phase related to a project plan. Moreover, to keep the momentum going we always work with low cost disciplined approach that makes us unique in our league. Not easy but we are masters in taming the natural project chaos to reduce all sorts of risks.

Let's have an insight about our project management team. Developing 'hand in glove' like relations with clients to shape an integrated team is our inherent character. Our proficient team easily understands complexities of big projects by paying utmost care and attention to every detail. There is more like with its assiduous working culture our team provides necessary agility to a project plan. Last but not least, it is pertinent to mention here that we have equipped our expert team with state-of-the-art project management techniques. Irrespective of your geographical location (On shore or off shore) remember our team is well equipped to deliver value added management services for maximum returns to our clients.

In nut shell, differing as 'chalk and cheese' from rivals we always strive for successful project management. Unquestionably, with our project management system we have given exceptional operational efficiency to projects of all our clients. All this enabled us to craft a separate niche as top Project Management Company of the region. In the end, you can freely rely on our expertise to look your dreams growing in right direction.

To get more insights about our past and current project management tasks kindly contact our experts.

Project Preparation and start up

No dream can turn into a reality unless or until you don't have a plan. Well developed plan with a disciplined approach in fact plays a critical role in the success of a specific project. We strongly believe in this and hence before initiating any venture we first chalk out a project plan. Best part is that we simply go with living project plans only. So, that in case of bottlenecks or roadblocks we can always make necessary modifications considering prevailing situation at that particular moment. However, before initiating the work on ground we cast thorough spotlight on all significant components of a project plan. We work with open approach where discussion with projects promoters, partners and stakeholders over the roadmap regularly takes place.

Furthermore, our project managers use latest project management tools like SWOT, LFA and project management apps to every time hit the sweet spot of a project. Not only this, with our tools we improve quality as well as do cost cutting for client.

Few significant aspects of our proved and trusted project management methodologies are given below as a ready reference:

1. Project conception
2. Resource evaluation
3. Project description and planning
4. Discussion of planning and implementation guidelines
5. Define roles and responsibilities
6. Contract preparations
7. Risk management
8. Project execution
9. Project monitoring
10. Project performance evaluation
11. Project close

Project Resource Management

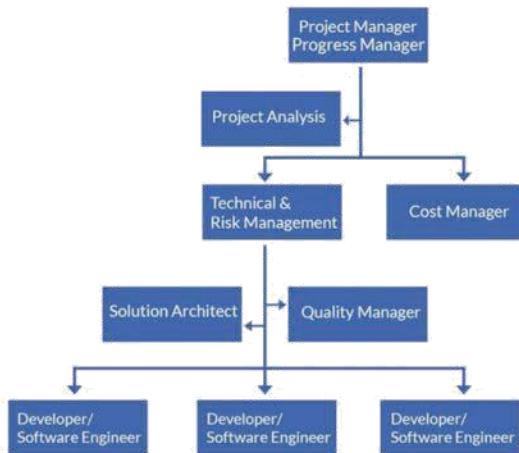

Figure 1: Project management organization model

“Targeting 100 % utilization of all resources is what we look for”

With our up to date project resource management planning we help clients to avoid that sinking feeling of resource mishandling. We look forward to give benefit of cost savings to our clients, by managing their all sorts of project resources like finances, employees, inventory, IT and production. Going further, we are well aware that every project schedule is a multi track event. Hence, by ensuring availability of just right resource, at right place, on right time, we swiftly take project schedule to its concluding point. Avoiding under or over allocation of any resource to any specific section of a project plan we guarantee higher productivity of our client. Ensuring this we work with flexible resource management plans for easy juggling among multiple tasks. This simply gives us an edge to keep the project pace always on the top of the mountain.

It does not matter for us from where we obtain project resource i.e. internal source (client) or external source (third party), gelling quickly to make a cohesive unit is our natural quality. Not only this, practice of conducting regular meetings with clients to deliver timely information about any change in the resource management plan or project schedule sets us apart from our competitors. With our super organized resource planning style we share timely information about risks and limitations related to a specific project.

Figure 2: Technical Management organization

Technical Management Responsibility Areas

Implementation management

- The technical manager is responsible for planning and managing the application implementation.
- The technical manager leads the implementation planning, plus the commissioning and integration work to obtain customer acceptance of the application elements.

System acceptance testing

- Definition of all acceptance processes, procedures, criteria, and system acceptance test plans that are in line with the terms and conditions of the contract with the customer.
- Tracking and monitoring of acceptance progress, clarification of any open issues, and the definition of action plans needed to have a pro-active approach to avoid delays in acceptance.
- Monitoring of key performance metrics and fault resolution with the customer to make sure that business needs are met and that quality of service is maintained as agreed.

Fault management

- Support for application modules integration. If problems are encountered at integration, the technical management team takes the lead in troubleshooting and fault resolution activities until all faults are identified and the module is successfully integrated.
- Impact analysis to determine the extent of the fault. In some cases the outcome of a failure report may be a software correction.
- Fault management is supported by Webcom's customer care organization.

Configuration Management

Management of customer software release upgrades and updates, as well as maintaining a reference list with required software/hardware levels and parameters as agreed with customer.

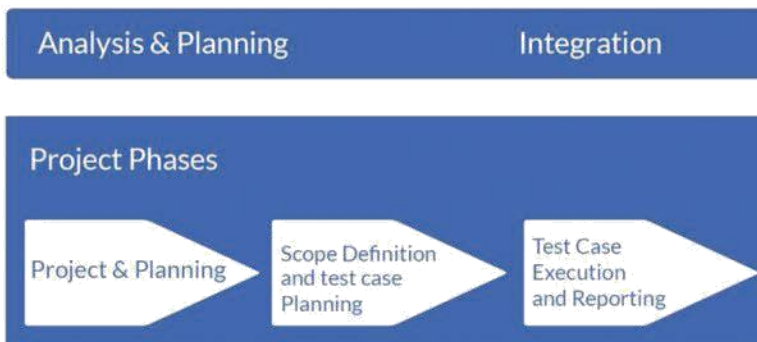

Figure 3: Verification Phases

Project Planning:

During a kick-off and consequent planning meetings with the customer following topics are agreed:

- Non-disclosure agreements (NDA)
- Technical scope
- Processes and documentation
- Share of responsibilities
- Schedule
- Reporting

Scope definition and test case planning:

In this phase the test case list together with required tools and test equipment, test configuration and other prerequisites will be defined. Prior to start of the testing activities all involved parties will review the processes, test cases, and schedule, and explicitly agree and commit to the test plan.

Consultancy

"With our consultancy services we make business landscape smooth by crafting more income generation streams for a corporate house"

It has often been observed that even many good corporate houses find it difficult to enter new arenas of market. The reason is, they have no expertise and lack ample IT knowledge about how to penetrate a new market. Consequently, they fail to analyze, synthesize and organize their IT development strategies. By and large, startup companies too face such unwelcoming odd situations. Certainly, there are certain points and rules that are relevant to all kinds of businesses. Let's be fair and accept this harsh reality.

To overcome such hostile market situations, Webcom System with its deep domain knowledge provides wide ranged positive IT consultancy services. We offer critical consultancy for both business and IT applications to run swiftly, perk up the performance, trim down costs and speed up returns on investment. Additionally, reinventing new income streams to excel our client's growth and market penetration is our prime motto. With industries best practices we always take long term, low cost and well defined strategic approach to deliver value throughout the consultancy cycle. Such progressive thinking of our global R&D and technical networks enables us every time to deliver leading value added consulting and services.

We well understand that each business has its own necessities and limitations. Hence, after meticulously understanding the client's needs, current processes, budget and time lines we offer bespoke consulting services. This obviously enables us to give exclusive customized leading edge solutions to fit a specific client's requirement. There is more in our bag, as from our technologically well equipped office we are competent enough to offer international consultancy to forward thinking off shore clients. Greatest advantage of working with us is that we have recruited well experienced project management consultants having deep industry knowledge. Last but not least, commitment to serve our esteem clients even beyond 'terms and conditions' of contract agreement sets us apart from our rivals. Bottom line is that we have all necessary features to give strength and depth to our wide spread consultancy business.

Don't lag behind! Just hone up your market presence with Webcom Systems top consultants.

Outsourcing

**"With our path breaking business outsourcing services

Some of our Products :

ORDER MATCHING EXCHANGE

INDUSTRY :- FINANCE / STOCK TRADING

Overview :-

Order Matching Exchange is the most advanced electronic exchange system , where broker can add any of the instruments for trading. Clients can swiftly check price , can fix limits and trade on live rates of the instruments.

Our Order Matching Exchange works according to a standard price/time priority algorithm, which means that at first order with better price will be matched. In case orders are at the same price, every order come with time stamp and the one placed earlier will have priority in execution. Each limit order (e.g. buy limit at 1.2245 vol. 100.000) placed by the client is sent to aggregated order book building brokers' own liquidity and reducing spreads for trading clients.

This means that trades can be executed at brokers' clients prices. If this limit order meets with other client order (market or limit) transaction will be executed by Matching Engine, which will result in a transaction directly between two clients. About 30-35% of all trades are executed as a result of limit orders, this is your potential saving.

Order Matching Engine Exchange is one of the fastest and the most robust Matching Engine Exchange technology for the retail forex market and Crypto Currency Trading. It has exhibited technical superiority with:

- Execution speed of over 50,000 transactions per second;
- Less than 3 milliseconds of execution latency;
- Strict price/time priority matching algorithm;
- Open order book with full market depth

TRADING PLATFORM

INDUSTRY :- FINANCE / STOCK TRADING

Overview:-

Golden Eye Technical Analysis Software

INDUSTRY :- TRADING TOOLS & SOLUTION

Overview :-

Golden Eye software is one of the most modern and trending technology available in the trading industry. It is the product of quality research, in-depth knowledge and proper implementation.

Features:-

It uses the most understandable and user friendly tools to manage the trading. The most important and significant features are listed below.

Charts are always easy to understand, and the software prepares charts for price pattern and market trend.

All the detailed features like Head and Shoulder, Double Reversal Patterns, Technical Indicators, are easily understood from the software. It also simplifies to look up the moving averages, lines of support, channels and trending and also the resistance according to the market.

Transformation of price and other data like up and down of market and mathematical calculations are done by the software itself. These are all market indicators including advantage data and decline data which can easily displayed by the high quality Golden Eye Software.

There are as many as 26 strategies in built in the software. So, you will always have an upper hand in trading strategies.

The Golden Eye has the capability to show the PIVOT point. Along with it also populates the different kind of resistance in the market. It also provides the support in Live Market.

FIBONACCI is one of the most advantageous features present in Golden Eye. It can work on 89 days moving average by the virtue of the feature.

The credibility of Golden Eye further increases with the wisdom features of it. It helps you to understand where to enter the market and where to exit. This is a great boost for the investors and traders.

In addition to it, Golden eye gives you idea about where to keep the loss and where to keep the profit with the help of differential support and resistance level.

There is no need of any other software or data feed once you start using Golden Eye. It covers all segments and all aspects of the market with large coverage. The signal accuracy is more than 90% provided you have followed the parameters properly.

FUNDZME INDUSTRY :- CROWDFUNDING

Overview :-

Crowd funding is a method of raising capital through the collective effort of friends, family, customers, and individual investors. This approach taps into the collective efforts of a large pool of individuals—primarily online via social media and crowd funding platforms—and leverages their networks for greater reach and exposure.

From tapping into a wider investor pool to enjoy more flexible fundraising options, there are a number of benefits to crowd funding over traditional methods. Here are just a few of the many possible advantages, which we'll cover in greater detail later in this guide:

Reach — By using a crowd funding platform like Fundzme, you have access to thousands of accredited investors who can see, interact with, and share your fundraising campaign.

Presentation — By creating a crowd funding campaign, you go through the invaluable process of looking at your business from the top level—its history, traction, offerings, addressable market, value proposition, and more—and boiling it down into a polished, easily digestible package.

PR & Marketing - From launch to close, you can share and promote your campaign through social media, email newsletters, and other online marketing tactics. As you and other media outlets cover the progress of your fundraise, you can double down by steering traffic to your website and other company resources.

Validation of Concept — Presenting your concept or business to the masses affords an excellent opportunity to validate and refine your offering. As potential investors begin to express interest and ask questions, you'll quickly see if there's something missing that would make them more likely to buy in.

Efficiency — One of the best things about online crowd funding is its ability to centralize and streamline your fundraising efforts. By building a single, comprehensive profile to which you can funnel all your prospects and potential investors, you eliminate the need to pursue each of them individually. So instead of duplicating efforts by printing documents, compiling binders, and manually updating each one when there's an update, you can present everything online in a much more accessible format, leaving you with more time to run your business instead of fundraising.

GEO SENZ IS CHANGING THE WAY PARENTS AND KIDS STAY CONNECTED

INDUSTRY :- IT/GPS/ADVERTISING
